

PADI DISCOVER SCUBA DIVING

Course Overview

The PADI DISCOVER SCUBA DIVING program introduces people to scuba diving in a highly supervised and relaxed manner. It dispels common misconceptions about scuba by letting individuals try it for themselves. Under the guidance of a PADI professional, new divers learn basic safety concepts, put on equipment and swim around underwater in a closely supervised environment. The diving portion will take place in a swimming pool.

The desired result is to excite people about scuba diving and encourage additional participation.

Prerequisites:

Individual participants must be older than 10 years.

Participants must review, complete and sign the Padi Discover Scuba Diving affirmation of risk and medical history screen which I will supply and must be completed before entering the water.

- a) Parent or guardian signature required for new divers younger than legal age.
- b) If the new diver answers "yes" to any condition on the form's medical history section, the diver must receive medical approval prior to any in-water activities.

Course Layout:

At the information session where a short video presentation will be shown and a brief safety and rules session after which divers will answer a knowledge and safety review. An equipment familiarization will follow the knowledge review.

Pool session will start with an equipment re-familiarization.

Divers will then enter the water in small groups directly supervised by a Professional Dive Instructor.
